JUN 22 2026

DENR ADMINISTRATIVE ORDER
NO. 2026 - 28

SUBJECT : **CHEMICAL CONTROL ORDER (CCO) FOR VINYL CHLORIDE**

Pursuant to Republic Act 6969 otherwise known as the "Toxic Substances and Hazardous and Nuclear Wastes Control Act of 1990", DENR Administrative Order (DAO) No. 29, series of 1992 also known as the "Implementing Rules and Regulations of Republic Act 6969", Republic Act No. 8749 also known as the "Philippine Clean Air Act of 1999" and DAO No. 05, series of 2005 "Toxic Chemical Substances for Issuances of Chemical Control Orders, the following pertinent rules and regulations with procedural requirements for Chemical Control Order (CCO) for vinyl chloride, and its wastes are hereby promulgated.

SECTION 1. Basic Policy. It is the policy of the State to regulate, restrict, or prohibit the importation, manufacture, handling, processing, storage, sale, distribution, use, and disposal of chemical substances and mixtures that present unreasonable risk and/or injury to human health and the environment; to prohibit the entry, even in transit, of hazardous and nuclear wastes and their disposal into Philippine territorial limits for whatever purpose, and to provide advancement and facilitate research and studies on toxic chemicals.

SECTION 2. Objectives. Pursuant to the policy statement, this Order aims to:

2.1. Reduce the risk of exposure to human health and the environment of vinyl chloride used in industrial processes;

2.2. Increase awareness of the toxicity of vinyl chloride, and the availability of technically superior and safer alternatives;

2.3. Ensure the proper implementation of the existing framework and appropriate prevention-based programs to mitigate, reduce and eliminate risks from the use of vinyl chloride; and

2.4. Provide guidelines to identify potential vinyl chloride release/exposure in industrial facilities to reduce human exposure to vinyl chloride.

SECTION 3. Scope and Coverage.

3.1. **Coverage.** This Order shall cover the following:

3.1.1 Importers
3.1.2 Distributors
3.1.3 Manufacturers
3.1.4 Industrial Users

3.1.5 Commercial User

3.2. **Exemptions.** This Order shall not cover the use of vinyl chloride and vinyl chloride that is regulated by other laws, including, but not limited to:

3.2.1. Polymers containing vinyl chloride as monomer
3.2.2. Foodstuff, pharmaceutical drugs, cosmetics, household/urban hazardous substances (HUHS), and consumer health products under the Food and Drug Administration (FDA) of the Department of Health (DOH)
3.2.3. Product Standardization under Bureau of Philippine Standards (BPS) of the Department of Trade and Industry (DTI)
3.2.4. Vinyl chloride and vinyl chloride-containing mixtures that are part of an article as defined in EMB Memorandum Circular (MC) 2020-005[1], shall be exempted from the CCO requirements, unless otherwise specified in related policies.

SECTION 4. Definition of Terms. As used in this Order, the following terms shall be defined as:

4.1. Applicant – the juridical and natural person or entity engaged in the importation, manufacture, use, and distribution of vinyl chloride and vinyl chloride-containing mixtures.
4.2. Chemical Control Order (CCO) – a regulation issued by the DENR that either prohibits, limits, or places such controls and conditions on the use, manufacture, import, export, transport, process, storage, possession, or sale of chemical substances to abate their risks to public health and the environment.
4.3. Chemical Substance – any organic or inorganic substance of a particular molecular identity excluding radioactive materials and includes – any element or uncombined chemical, and any combination of such substances, or any mixture of two or more chemical substances.
4.4. Commercial User – any juridical and natural person or entity that uses vinyl chloride and vinyl chloride-containing mixtures in a commercial enterprise providing saleable goods or services, including laboratory facilities[2] , including its ancillary operations on their processing, handling, and storage. This is sometimes referred to as a professional user.
4.5. Distributor – any juridical person or entity that is engaged in the sale and distribution of vinyl chloride and vinyl chloride-containing mixtures, including its ancillary operations on their handling, storage, transportation, and sale.

[1] EMB MC 2020-005 Data Requirements for Pre-Manufacture and Pre-Importation Notification (PMPIN) Procedures
[2] Adapted definition from the US Environmental Protection Agency (2012). 40 CFR Subchapter R – Toxic Substances Control Act, Part 711 – TSCA Chemical Data Reporting Requirements

4.6. Importer – any juridical and natural person or entity that undertakes the entry of vinyl chloride and vinyl chloride-containing mixtures into the Philippine territory, including its ancillary operations on their handling, storage, and transportation.

4.7. Industrial User – any juridical and natural person or entity that uses and processes vinyl chloride and vinyl chloride-containing mixtures at its premises for which they are consumed as a reactant; incorporated into a formulation, mixture, reaction product, or article; or repackaged[2], including its ancillary operations on their processing, handling, and storage.

4.8. Manufacturer – any juridical and natural person or entity that undertakes the manufacture or production of vinyl chloride and vinyl chloride-containing mixtures for commercial purposes, including the extraction of a component chemical substance from a previously existing chemical substance or complex combination of chemical substances, including its ancillary operations on their processing, handling, storage, and transportation.

4.9. Monomer – molecule that has reactive functional groups or double/triple bonds capable to forming a polymer. A chemical substance that is capable of forming covalent bonds with two or more like or unlike molecules under the conditions of the relevant Polymer-forming reaction used for the particular process.

4.10. Polymer – (1) means a substance consisting of molecules characterized by the sequence of one or more types of monomer units and comprising a simple weight majority of molecules containing at least three monomer units which are covalently bound to at least one other monomer unit or other reactant and consists of less than a simple weight majority of molecules of the same molecular weight. Such molecules must be distributed over a range of molecular weights wherein differences in the molecular weights are primarily attributed to difference in the number of monomer units; (2) is a substance composed of more than 50% of molecules containing a sequence of at least three monomer units covalently bound at least one other monomer unit or other reactant; (3) has molecules distributed over a range of MW; and (4) has no single MW molecule reaching 50% (w/w) of total molecules.

4.11. Polyvinyl Chloride – produced by polymerization of the vinyl chloride monomer.

4.12. Storage – a containment area for supply or stock reserve kept for future use, safekeeping, or disposal.

4.13. Treatment, Storage and Disposal (TSD) Facility – Facility where hazardous wastes are transported, stored, treated, recycled, reprocessed, and disposed of.

4.14. Vinyl Chloride – is a colourless, compress liquefied flammable gas. It has a slightly sweet odour, heavier than air, relatively low solubility in water but is soluble in almost all organic solvents with a Chemical Abstract Registy Number (CAS RN) of 75-01-4. It is listed as Group 1 by the International Agency for Research on Cancer (IARC) wherein the chemical has been determined to be carcinogenic to humans, and has sufficient evidence to cause angiosarcoma of the liver and hepatocellular carcinoma.

SECTION 5. Prohibited Use. This Order prohibits the use of vinyl chloride in aerosols as a propellant or ingredient.

SECTION 6. General Requirements and Procedures. General Requirements and Procedures. In addition to the general requirements under Title II of DAO 1992-29[3], this Order shall establish the following requirements and procedures for any applicant allowed under Section 5 in the importation, manufacture, distribution, and use of vinyl chloride and vinyl chloride-containing mixtures:

6.1. **Registration and Permitting.**

6.1.1. **Permitting Procedures.** All applicants covered under Section 3.1 shall accomplish the CCO Registration (CCOR) module of the Online Permitting and Monitoring System (OPMS), submit the required documents, and secure the corresponding Registration Certificate, for the following:

6.1.2.1 Any new applicant or newly involved in the importation, manufacture, distribution and use of vinyl chloride and vinyl chloride-containing mixtures

6.1.2.2 Any applicant with an existing Priority Chemical List (PCL) Compliance Certificate or with PCL exemptions issued under EMB MC 2014-003[4] or users of vinyl chloride and vinyl chloride-containing mixtures who are exempted under EMB MC 2017-007[5], to be categorized as a new applicant

6.1.2.3 Any applicant with an approved registration who requests an amendment to change, add, delete, or update specific information on its application and permit, except for the change of facility location

6.1.2. **Documentary Requirements.** The applicant for registration or its amendment shall submit the following documents:

6.1.2.1 Environmental Compliance Certificate (ECC) Certificate[6]

[3] Title II of the DENR AO 1992-29 Toxic Chemical Substances of the Implementing Rules and Regulations of Republic Act 6969
[4] EMB MC 2014-003 Supplemental Guidelines for the DENR AO 2007-23 (Prescribing Additional Requirements for the Issuance of the Priority Chemical List (PCL) Compliance Certificate)
[5] EMB MC 2017-007 Clarification on the Coverage of Laboratory Facilities under the Requirements of DENR AO 2007-23 (Prescribing Additional Requirements for the Issuance of Priority Chemical List (PCL) Compliance Certificate)
[6] DENR AO 2003-30 Implementing Rules and Regulations for the Philippine Environmental Impact Statement (EIS) System (Presidential Decree 1586)

The other applicable environmental permits, including the Hazardous Waste Generator (HWG) Registration Certificate[7], Wastewater Discharge Permit (DP)[8], Permit to Operate (PTO) Air Pollution Source Equipment or Installation (APSE/APSI)[9], and Pollution Control Officer (PCO) Accreditation[10], among others, shall be complied with pursuant to the requirements under their respective laws, but shall not be prerequisites prior to the screening, evaluation, and approval of the CCO Registration.

6.1.2.2 Chemical Management Plan

As integrated into the CCOR module, the applicant shall provide information on how vinyl chloride and vinyl chloride-containing mixtures are managed in its facility to eliminate or minimize their risk to human health and the environment, in accordance with the requirements in Sections 6.1.3 to 6.1.7. The plan shall include:

6.1.2.2.1 General chemical exposure prevention and release control program;
6.1.2.2.2 Housekeeping and occupational hygiene practices implemented;
6.1.2.2.3 Safety equipment and devices used in handling the chemical; and
6.1.2.2.4 Personal Protective Equipment (PPE) provided to the workers.

6.1.2.3 Contingency and Emergency Plan

As integrated into the CCOR module, the applicant shall provide information on its incident response procedure in case of accidents and calamities leading to vinyl chloride exposure or unintentional release, e.g., chemical spill, fire, explosion,

[7] DENR AO 2013-22 Revised Procedures and Standards for the Management of Hazardous Wastes (Revising DENR AO 2004-36)
[8] DENR AO 2005-10 Implementing Rules and Regulations of the Philippine Clean Water Act of 2004 (Republic Act 9275)
[9] DENR AO 2000-81 Implementing Rules and Regulations of the Philippine Clean Air Act of 1999 (Republic Act 8749)
[10] DENR AO 2014-02 Revised Guidelines for Pollution Control Officer Accreditation

earthquake, etc. It shall follow the emergency response program requirements under Section 8 of DENR AO 2013-22[7].

6.1.2.4 Substitution and Phase-out Plan

As integrated into the CCOR module, the applicant, in possession of vinyl chloride and vinyl chloride-containing mixtures whose intended uses are prohibited in this Order, shall cease such activities and provide information on eliminating its stockpile, substituting with alternatives, or diversion to other allowed applications, following a phase-out timeline set in the terms and conditions of the Registration.

6.1.2.5 Safety Data Sheet (SDS) compliant with the Globally Harmonized System (GHS)[11]

6.1.2.6 Process flow chart specific to the manufacture, processing, handling, and/or use of vinyl chloride and vinyl chloride-containing mixtures

6.1.2.7 Certificates of worker training on vinyl chloride safety

6.1.2.8 Photos of storage, manufacturing, and/or processing facilities

6.1.2.9 Latest Self-Monitoring Report (SMR)[12]

6.1.2.10 Proof of payment of prescribed application fee

6.1.3. **Handling and Storage Requirements.** The applicant shall ensure that its facility complies with the following:

6.1.3.1. Availability and accessibility of the SDS at all times;

6.1.3.2. Proper stacking/stockpiling, packaging, chemical compatibility arrangement, containment, and storage conditions, including good security practices, in conformity with the SDS;

6.1.3.3. Adequate engineering controls with proper signage and labeling of chemicals; and

6.1.3.4. Maintain an updated inventory of stored chemicals.

---

[11] EMB MC 2015-011 Guidance Manual for DAO 2015-09 "Rules and Procedures for the Implementation of the Globally Harmonized System (GHS) of Classification and Labelling of Chemicals in Preparation of Safety Data Sheets (SDS) and Labelling Requirements of Toxic Chemical Substances"

[12] DENR AO 2003-27 Amending DAO 26, DAO 29, and DAO 2000-81 Among Others on the Preparation and Submission of Self-Monitoring Report (SMR)

6.1.4. **Labeling Requirements.** Storage containers and packaging of vinyl chloride shall be properly classified and labeled following the current GHS implementation guidelines. On the other hand, vinyl chloride waste labeling shall be in accordance with the current procedural manual on hazardous waste management.

6.1.5. **Manufacturing and Usage Requirements.** For manufacturers and industrial and commercial users, the applicant shall ensure that its facility and workers comply with the following:

6.1.5.1. Conform with its standard operation flow chart and process description where vinyl chloride is used, applying all necessary measures and procedures by means of engineering controls, good work practices, and industrial hygiene to reduce the dispersion of vinyl chloride into the environment and minimize employee exposure to vinyl chloride;

6.1.5.2. Proper wearing of PPE in hazardous areas as prescribed by the Occupational Health and Safety Center (OSHC) of the Department of Labor and Employment (DOLE);

6.1.5.3. Establish regulated areas to be classified as hazardous zones wherever an employee's exposure to concentrations of vinyl chloride is high and shall ensure that these areas are demarcated from the rest of the workplace, thereby alerting the workers of the boundaries where PPEs should be worn;

6.1.5.4. Secure updated environmental permits, if applicable, as enumerated in Section 6.1.2.1

6.1.5.5. Conduct self-monitoring of potential sources of vinyl chloride in compliance with DENR-EMB standards for wastewater effluents and air emissions and report them accordingly in the SMR.

6.1.6. **Waste Disposition Requirements.** All hazardous waste generators, waste service providers, waste transporters, and TSD facilities of vinyl chloride waste shall comply with the procedural manual on hazardous waste management.

6.1.7. **Training Requirements.** Basic awareness training, knowledge-sharing, and other capacity-building activities shall be conducted regularly for workers who handle vinyl chloride. These activities shall include discussions on the health and environmental hazards of vinyl chloride, safe handling, risks in the workplace, proper disposal, incident response, and other regulatory requirements.

6.2. **Importation and Permitting.**

6.2.1. **Permitting Procedures.** In addition to the compliance requirements under Section 6.1, all applicants covered under Section 3.1.1. shall accomplish the CCO Importation Clearance (CCOIC) through the OPMS, submit the required documents, and secure the corresponding Importation Clearance Certificate:

6.2.1.1. Any new applicant and/or newly involved in the importation of vinyl chloride and vinyl chloride-containing mixtures

6.2.1.2. Any applicant with an existing Priority Chemical List (PCL) Compliance Certificate or with PCL exemptions for vinyl chloride issued under EMB MC 2014-003[4], or importers of vinyl chloride and vinyl chloride-containing mixtures who are exempted under EMB MC 2017-007[5], to be categorized as a new applicant

6.2.1.3. Any applicant with an approved importation clearance who requests an amendment to change, add, delete, or update specific information on its application and permit, except for the change of facility location

6.2.2. **Documentary Requirements.** The applicant for importation clearance, its renewal, or its amendment shall submit the following documents:

6.2.2.1. Proof of import entry, e.g., BOC Single Administrative Document, Bill of Lading, and/or Packing List

6.2.2.2. Proof of payment of prescribed application fee

6.2.3. **Validity.** The importation clearance shall be valid for one (1) year and shall only cover shipment arrivals and port entries

within that period. It may be renewed not earlier than twenty (20) working days prior to expiration. On the other hand, it may be amended not later than twenty (20) working days prior to expiration

SECTION 7. Communication, Education and Public Awareness (CEPA). The DENR-EMB, in collaboration with the chemical industry, concerned government agencies, the academe, and non-government organizations, shall promote industrial compliance and public awareness of this Order's requirements and the hazards posed by using vinyl chloride in the workplace and its release into the environment.

The proper handling and disposal of vinyl chloride shall be included in the CEPA activities to highlight the required safety protocol. The use of vinyl chloride-free substances and materials shall also be promoted to minimize exposure to human health and the release of vinyl chloride into the environment.

SECTION 8. Public Access to Records and Confidential Business Information (CBI). The public shall have access to records, reports, or information obtained by the DENR upon request pursuant to this Order, in accordance with Section 12 of RA 6969 except information regarding trade secrets (formulations), sales figures, methods of production, or industrial processes, distributions that would adversely affect the competitive position of such importers, manufacturers and industrial users.

Exemptions to this "no disclosure of information" shall be made subject to the conditions of Section 40 of the IRR of RA 6969 or as may be amended.

SECTION 9. Compliance Monitoring Procedure. The Regional Offices shall monitor compliance based on duly accomplished and submitted Self-Monitoring Report (SMR) per DAO No. 2003-27 or its revision or amendment. The EMB-CO shall integrate the regional monitoring report for management action. For complaints of non-compliance, sampling and testing shall be made, as necessary, using a method that conforms with international and/or national standards.

SECTION 10. Devolution of CCO Applications to EMB Regional Offices. The issuance of the CCOR and CCOIC shall be devolved to the EMB Regional Offices three (3) years from the effectivity of this Order.

SECTION 11. Revision of Requirements. The DENR may amend, modify, and/or supplement the requirements and standards in this Order after prior consultation with the stakeholders and after due notice and hearing with the public on matters to be revised. Moreover, the DENR may issue clarificatory guidelines if necessary.

SECTION 12. Capacity Building. The EMB Central Office shall develop and conduct continuing training program for both the regulated community and regulators to ensure proper compliance with this Order.

SECTION 13. Coordination with Other Government Agencies. The DENR-EMB shall coordinate with other government agencies, particularly those mandated by

other laws on chemical regulation, and align their policies and programs to ensure the safe use of vinyl chloride and vinyl chloride-containing mixtures.

SECTION 14. Liability. The Secretary or his duly authorized representative may cause the impoundment or confiscation of any chemical substance and its conveyance and container if there is reasonable ground to believe that the sale, storage, possession, use, manufacture, transport, or import of the chemical substance does not comply with this CCO, following the guidelines under EMB MC 2020-12[13] and confiscation policies to be developed by the DENR-EMB. Any manufacturer, importer, or distributor selling to non-authorized persons or end-users, including in online marketplaces and electronic commerce systems, shall be held liable under RA 6969.

Chemicals may be confiscated, and storage fees of confiscated chemicals shall be charged jointly and solidarily to the importer and/or distributor and end-user. The importer and distributor shall likewise be held liable together with the end-user in cases of injury or damage to public health and the environment. They shall properly compensate the affected parties and restore the damaged area or areas resulting from any incident or accident involving the use, sale, manufacture, distribution and storage of vinyl chloride and vinyl chloride-containing mixtures and transport, treatment, and disposal of vinyl chloride wastes.

SECTION 15. Penalty Provision. Any violation of the requirements specified in this Order shall subject the juridical and natural person or entity liable to the applicable administrative and criminal sanctions as provided for under Sections 14 and 15 of RA 6969, Sections 43 and 44 of DENR AO 1992-29, and DENR MC 2005-003[14].

SECTION 16. Separability Clause. If any provision of this Order shall be held invalid or unconstitutional, the other portions or provisions hereof which are not affected shall continue in full force and effect.

SECTION 17. Repealing Clause. All Orders and other similar issuances inconsistent herewith are hereby revoked, amended, or modified accordingly.

SECTION 18. Effectivity. This Order shall take effect fifteen (15) days after its publication in a newspaper of general circulation and upon filing of three (3) certified copies hereof with the Office of the National Administrative Register (ONAR), UP Law Center.
