<ol style="list-style-type: none"> 1) Updates on Section 13.8: List of Point of Contact and Point Persons 2) Discussion on Section 15: Joint Undertaking of Government Agencies 3) Presentation of IPOPHL on Data Sharing 4) Next Steps for the Enforcement of JAO 22-01 	
Highlights:	
<ul style="list-style-type: none"> • The meeting was chaired by Undersecretary Ruth B. Castelo of the Consumer Protection Group of the Department of Trade and Industry and was called to order at 10:00 AM. Present in the meeting are representatives, including officials from DOH-FDA, DTI, IPOPHL, NPC, SEC, NTC, DA-AMAS DENR-PSD, DENR-BMB, DENR-FMB and DENR-EMB. • Usec. Castelo said that the meeting was conducted mainly to discuss among the signatory and relevant agencies the next steps following the issuance of JAO 22-01. <p>➤ Updates on Section 13.8: List of Point of Contact and Point Persons</p> <ul style="list-style-type: none"> • Usec. Castelo sent a letter to the signatory agencies requesting for the submission of list of point persons pursuant to Section 13.8 of JAO 22-01, wherein the regulatory agencies must designate in writing their respective point of contact that shall be fully authorized to issue notice of violations (NOV) to digital platforms and/ or e-marketplaces. • Dir. Junibert De Sagun of DA-AMAS informed that they have yet to finalize their point persons and identify the appropriate Office who will handle, in the meantime, DA-AMAS will be attending the meetings. For. Llarina S. Mojica of DENR-PSD also informed that the Department will be resubmitting a revised list of point persons, the proper Office who will handle is yet to be identified. • On the submission of DOF-FDA, in which the contact point is each FDA regional field office, Usec. Castelo requested if FDA can submit a centralized point person on the issuance of NOV, to avoid having multiple/ long list of point persons. Deputy Director General Arnold Alindada clarified that they assigned point persons per region in case of regional concerns but for the centralized point of contact and authorized to issue NOVs is the FDA- Field Regulatory Operations Office which is under his supervision. <p>➤ Discussion on Section 15: Joint Undertaking of Government Agencies</p> <ul style="list-style-type: none"> • Under JAO 22-01, there is a special section on how the government agencies will be working together to implement the JAO. There are 4 sections in the JAO (15.1-15.4) that the agencies must agree on the operational procedures. 	

- Asec. Pacheco said that as a first step, the agencies can exchange information, for example the FDA can share information in its MOA with Lazada, to get some idea on what the group can do and how to work together. FDA responded that it was only a draft MOA and was not pushed through and they are still looking into its legalities. Currently, FDA is conducting coordination meetings with Facebook and Shopee so that they would be able to facilitate taking down the posts with violations that were posted in their platforms.
- Usec. Castelo responded that there is no need for any MOA with individual agencies and the platforms, instead full implementation of JAO 22-01. She added that FDA may not pursue the MOA, and for agencies with existing MOAs with the platforms, they may or may not use the Agreements anymore.
- IPOPHL shared that they have an existing MOU between the platforms, specifically, Shopee, Lazada, and Zalora, between platforms and brand owners. The MOU is basically a code of conduct and there are key performance indicators (KPIs) which mandate that platforms upon reports from brand owners, will trigger their intellectual property policies and start investigation and appropriate action, either suspension or cancellation of infringing sellers. The brand owners are required to report, give information and assistance to the platforms for them to mindfully and efficiently assess the items for sale that are the subject of the complaint. The IPOPHL is not a signatory of this MOU but they facilitate, they instead conduct yearly assessment of the MOU with regards to targets and achievements, and so far all the signatories have expressed that they will continue with the MOU. So even if government agencies, like IPOPHL is not a party to the MOU, there is efficiency of coordination and interaction between the brand owners and signatories, and they are also responsive to referrals from the IPOPHL because of their position in facilitating interactions in the MOU.
- Usec. Castelo asked if the agencies involved in the JAO have specific contact numbers that consumers can call, or e-mail addresses that consumers can write to for the complaints. IPOPHL responded that they have three avenues where consumers can reach them: e-mail address, SMS number, and Facebook page; DOH responded that they have an e-mail address and numbers that consumers can send reports to found in their website; NPC also has contact numbers and e-mail addresses for the filing of complaints with the NPC or data privacy violations; SEC has Corporate Governance and Finance Department to handle complaints on lending and financing activities.
- As for DENR, For. Mojica responded that for the formulation of the JAO, the Office of Usec. Jonas R. Leones is involved, however on the implementation, this should be handled by another office, either from Field Operations or the Enforcement Group. She said the matter will be raised first to the principals considering the structure and coverage of DENR. Usec. Castelo recommended having a centralized contact point for DENR as a whole, and for the bureaus. Asec. Mary Jean T. Pacheco requested also for the list of prohibited and regulated items of DENR, with corresponding bureaus which handle them.
- For. Mojica shared that in the early part of the year, DENR conducted a meeting with the platforms, attended by around 10 online platforms including Lazada. The Department has been waiting the issuance of the JAO and is planning into entering a MOA with them considering that there have been numerous reports with DENR concern. During the meeting the Department's regulations were presented and the platforms have expressed that they were not aware on some of the regulated items.

- Usec. Castelo requested for one central number or e-mail address for DENR for the complaints. Once the list of the e-mail addresses and contact numbers from all the concerned agencies is complete, an advocacy material will be issued for blast information on the implementation of the JAO.
- Dir. De Sagun shared that in DA, they have a Bantay Presyo Group, and under it is an Enforcement Unit. DA is also monitoring daily prices. He also expressed the same concern with DENR to come up with one central contact point, many of their offices are also involved, and they have yet to engage them after the meeting.
- Asec. Pacheco asked if the agencies have a dedicated group/ person who monitor online transactions, or deliberate effort on the part of the agency to monitor online.
 - DTI informed that they have six (6) personnel who monitor online. Usec. Castelo said that the dedicated team/ at least two (2) persons will have no other job but to monitor online transactions for violations.
 - SEC also has a dedicated team for tracking financial activities online, especially those operating without license, which is their basis for issuing cease and desist orders.
 - Usec. Castelo recommended that the Enforcement Bureaus of the DENR be advised to have a dedicated group/ persons for online monitoring.
 - Dir. De Sagun responded that DA does not have dedicated team monitoring online, but he is not sure with regards to the other regulatory offices of National Meat Inspection Service and Bureau of Plant Industry.
 - IPOPHL responded that they do not have dedicated personnel to solely do the monitoring online because of limitations in terms of personnel, but there are those that randomly do online monitoring on their free time. But with the directive, they will make provisions for the hiring of dedicated personnel as well as ensure their safe surfing, dedicated computers or phones or G-cash accounts, and they do not use their personal accounts to protect their safety.
 - Asec. Pacheco also suggested for each one of the regulators encourage all of their personnel to report violations they find online.
 - For FDA, they have 15 focal persons, each of the three (3) major platforms: Shopee, Lazada and Facebook, for each of the five (5) clusters: North Luzon (Regions 1, 2, 3 and CAR), South Luzon (NCR, Region 4-A, 4-B, and 5), Visayas (Regions 6, 7, 1nd 8), Mindanao East (Regions 10, 11, and 13) and Mindanao West (Regions 9 and 12). The focal will do the monitoring of the online platforms and if he/she finds a violating post, this is then reported to the platform, including the link to the post, and requesting the platform to take it down. In addition FDA also conducts investigation on the violating post and forwarded to respective investigator, wherein they could conduct test buy to validate whether the post is legit. The reports they find online are entered into a database. NOVs are not issued outright; the agreement is for the platforms to take down the post. After a series of investigations conducted, only then they will issue report of violation for the establishments that have been found with violations.
 - Asec. Pacheco emphasized that under Section 13.2 of the JAO, in case of a prima facie violation of any pertinent laws and regulations committed in an online post, the concerned authorized agency shall issue notice and the violator will be given three (3) days to take down the post.
 - For NPC, they have a Compliance and Monitoring Division composed of 20 plus

personnel, they do compliance check whether online or offline, privacy sweeps, or even on-site visits. With the numerous online lending data privacy complaints they received before, they also created a Task Force on online lending; they do sweeps on online lending platforms and investigations. Their Public Information and Assistance Division also monitors any complaints for NPC.

- Meanwhile, NTC responded that they do not have a dedicated team who monitors transactions online. However, they have a Consumer Welfare and Protection Division. Asec. Pacheco responded that NTC is not a signatory of the JAO, only when the JAO was already being circulated for approval was the NTC able to reach out to DTI for issues on the sale of scanners, boosters, cellphones.
- Usec. Castelo said that the next step is for the DTI E-Commerce Division to draft the implementing guidelines for the JAO. After completing the collation of the contact numbers, relevant materials, and Offices involved for the enforcement, the DTI will prepare the advocacy materials, and the agencies will cascade in their advertisement platforms, for uniformity.
- Usec. Castelo recommended exploring the possibility of having a computer system/ portal where all the concerned agencies can input and has access to complaints. This way, if other agencies find posts of violating posts online not under their jurisdiction, they can input in the said portal as a way of helping the other concerned agencies in their monitoring.

➤ **Presentation of IPOPHL on Data Sharing**

- Director Ann N. Edilion of IPOPHL gave a brief background of IPOPHL. It is the primary agency mandated to regulate and enforce intellectual property (IP) in all aspects and all mediums including the online space, hence their inclusion in the JAO. The IP Code is the primary law that regulates and mandates oversight powers of the IPOPHL. For its enforcement office, their coverage is on counterfeit goods, pirated goods and contents.
- In order to reach the public, consumers, IPOPHL has hotline numbers, Facebook page, e-mail address and SMS numbers that the public can reach to.
- In 2021 and 2022, they have received reports from concerned citizens, from brandowners or IP brandowners who aren't sure where to go and how to do, IPOPHL employees as well as government officials from other government agencies.
- Once they receive a report, they acknowledge and conduct preliminary investigation. And depending on the investigation, if it is an IP rights issue, they handle it and inform the brandowner to eventually file a formal complaint but if it is an IP right violation with adjacent violation that concerns other agencies, example is counterfeit Biogesic which is an IP rights violation and an FDA issue as well, they definitely refer it to the other agency concerned. If the report matures into a formal complaint, it will be treated as a case and will undergo clarificatory hearing and they will eventually issue enforcement actions. One of the things they can issue when they issue enforcement actions is first off a warning, cease and desist Order, and a notice to comply to remove the items from the market, cease and desist from selling. If the offender refuses to comply, they have a second level/ tier of enforcement actions. They can refer the case to enforcement agencies for investigation or for application for search warrant or eventual case build-up if they feel that it is more appropriately handled by the law enforcement agencies, and for a bigger case they make formal referral. Or they can also report to DTI and request for cancellation of business permits, or to the LGU for

them to cancel the business permit.

- They have created a referral system within the National Committee on Intellectual Property Rights (NCIPR). The Intellectual Property Rights Enforcement Office (IEO) of IPOPHL receives reports via email or formal letter of circumstances such as sale of counterfeit products online such as books, luxury items, food, and medicines). Several government agencies are working in relation to intellectual property rights and this interaction was formalized through the creation of the NCIPR in June 2008 under Executive Order No. 736 and involves 15 government agencies.
- The NCIPR conducts regular monthly meetings. For collaboration on information awareness campaign, NCIPR has a Facebook page wherein each member is assigned every month to contribute content, participates in destruction of seized goods, and mall/ market visits, distribution of information awareness materials; NCIPR also collaborates in operations/ raids; conducts product identification seminars, and other capacity building activities.

- She gave an example on Protocol for Online-related Counterfeit Medicines:

Phase 1 - Receipt and referral of information/ report/ complaint

- 1) Receipt of information/ report / complaint by any of the NCIPR members (other than NBI, PNP, and IPOPHL)
- 2) NCIPR acknowledges receipt and refers the same to the NCIPR through the IPOPHL (This is to avoid duplication of action that will jeopardize the investigation)
- 3) The NCIPR, through the IPOPHL, shall refer the information/ report/ complaint, or monitored case to the NBI or PNP Cyber Crime in an alternate basis.
- 4) If the NBI receives the information/ report/ complaint, the contact person of the receiving agency shall coordinate with the contact person of the other agency to confirm if the same information/ report/ complaint was reported to the latter agency, if possible.
- 5) Otherwise, if prior coordination is not feasible the receiving office shall accept and proceed with the investigation of alike cases. The result of the investigation can be joined later.

Phase 2 - Processing (Case Build Up and Initiation)

- 1) The NBI or the PNP, as the case may be, proceeds to act on the information/ report/ complaint in accordance with their respective internal rules on investigation relevant to online cases. For the PNP, the information/ report/ complaint pertaining to counterfeit drugs or medicines shall be coordinated with the Cyber Patroller and Intelligence Unit of the PNP- Anti-Cybercrime Group.
 - 2) Processing covers from investigation to initiation of action until finality of decision.
 - 3) Once the NBI or PNP deems the investigation completed, it shall refer the case to the FDA before or after the filing of criminal case in court for the FDA's appropriate administrative action.
 - 4) Reporting to NCIPR subject to the rule on confidentiality. The FDA shall follow its Uniform Rules of Procedures for Administrative Proceedings.
- The NCIPR maintains a comprehensive data management system wherein all agencies report to the secretariat all enforcement data (seizures, arrest, operations, etc.) which is regularly published and submitted to relevant authorities.

➤ **Ways Forward**

- DA to submit official designated point of contact and DENR to submit revised list of point of contact.
- DTI-CPAB and DTI ECO to draft the implementing guidelines of JAO 22-01.
- Member agencies to submit list of specific contact details for consumer complaints.
- DTI-CPG to initiate development of one advocacy campaign material, which will be rolled out to each member agency.
- Member agencies to establish a dedicated team/ personnel to monitor online transactions.
- DTI-ECO to request member agencies to submit listing of keywords, images and other information on regulated products.
- Member Agencies to create a common computer system for all agencies for consumer complaints.
- FDA to share their online monitoring mechanisms to other member agencies.
- Regular inter-agency check-up meetings, once in two months.

Having no other matters to discuss, the meeting was adjourned at 12:20NN.

Issues and Concerns:

Next Steps/ Recommended Actions

- DENR to submit to DTI its revised point of contact for the implementation of JAO 22-01.
