The baseline data gathering of gender-related information and collection of appropriate gender-disaggregated data aims to establish the appropriate gender-sensitive indicators important for environment and natural resources management programs, that will help address gender inequalities and differences in a client-focused manner.

The Gender and Development baseline data will serve as input to the Gender and Development Database and Information System that will be a basis in GAD planning, programming, and policy formulation.

The other members of the ERDB Gender and Development Focal Point System (GAD FPS) not mentioned above shall also serve as support to the National Working Group if their assistance is needed.

All expenses to be incurred in the performance of the said task shall be charged to their respective Bureaus' and Offices' GAD funds, subject to usual accounting and auditing rules and regulations.

This Special Order shall take effect immediately and remain in force until revoked by the undersigned and/or higher authorities.
