The report is a culmination of our collaborative efforts with partner National Government Agencies (NGAs), Non-Government Organizations (NGOs), academic institutions and other development partners, to assess the state and benefits of the oceans and the pressures and threats affecting our rich marine biodiversity.

The NSOC Report aims to help the government prioritize investments and reforms that support integrated coastal and ocean management and blue economy development. An electronic copy of the report may be accessed through the website of the DENR Foreign-Assisted and Special Projects Service (FASPS) or the website of the Partnerships in Environmental Management for the Seas of East Asia (PEMSEA).
